

Equine Performance Labs

Committed to Evidence & Quality

We believe your horse deserves more than promises. That's our mission: real, published research and complete transparency in how equicenta® CTM is made, so you and your veterinarian can trust what's in every vial.

The Evidence

- **Peer-Reviewed:** The science behind equicenta® CTM has been published in BMC Medicine - confirming a consistent, protein-rich profile and a strong safety record
- **Proven Consistency:** With less than 5% variation from batch to batch*, every dose delivers the same rich, protein-packed biology.¹
- **Ongoing Research:** Our clinical study enrollment and data analysis is complete. It's been submitted for publication.

The Quality

- **Sourced from Champions:** Sourced through our exclusive partnership with Coteau Grove Farms; a single source herd.
- **Made to the Highest Standards:** Manufactured under a certified quality system (ISO 13485) in a sterile, controlled environment
- **Safety You Can Count On:** Every lot is screened and tested before it ever reaches your horse.

equicenta® CTM

Landmark Study Published

The safety, characterization and bio compatibility of equicenta® CTM have been peer-reviewed and published in BMC Medicine (2025); confirming a consistent, protein-rich profile and favorable safety record in controlled studies.¹

Give Your Horse Every Advantage

equicenta® CTM is a ready-to-use injectable, derived from equine umbilical cord tissue, nature's richest source of growth and protective proteins.

It supports joints, tendons, and ligaments without relying on steroids or blood drawn from injured animals. Designed for both performance horses and beloved companions.

Your Horse's Future Deserves Thoughtful Care

Regenerative Musculoskeletal
Tissue Support Designed Around
Long-Term Soundness

equicenta® CTM is a patent pending, first-in-class, injectable, **cryopreserved microparticulate equine umbilical cord tissue** allograft, designed for **equine musculoskeletal tissue defects**.
Delivered as a **ready-to-use, protein-rich suspension**.

Horse First, Sport Second

equicenta® CTM

What Makes It Different?

First of Its Kind: equicenta® CTM is an injectable made from equine umbilical cord tissue, collected at birth when nature's repair proteins are most abundant.

Nature's Own Design: Over 2,600 active fetal proteins plus billions of exosomes. No synthetic additives, no unnecessary preservatives. Just nature's complete toolkit.

Triple Action: Unlike treatments that only reduce inflammation, umbilical cord tissue works on three fronts — supporting new tissue, managing the breakdown of cartilage and collagen, and calming inflammation.

More Than Blood-Based: PRP and IRAP only use what's already in your horse's blood. *equicenta® brings what blood can't: the structural proteins connective tissue needs.*

Farm to Vial: Vertically integrated from champion bloodlines to every vial, every step is traceable to a single trusted source.

No Steroids. No Shortcuts.: No steroids, no harsh additives. Designed to support real recovery, not mask the problem.

equicenta® CTM

Product Overview

Commonly Used For:

- Joint, ligament, and tendon health
- Ligament support and recovery
- Ongoing mobility maintenance
- Age-related stiffness and performance decline

What To Expect

- Your vet identifies the treatment area
- The injection is performed during the visit
- A short rest and rehabilitation period follows
- Gradual progress unfolds over weeks/months

Engineered to Keep Horses In Work

Whether your horse is a performance athlete or part of the family, equicenta® CTM provides reliable support to keep them active, comfortable, and performing their best.

equicenta® CTM

Sourced from Champions

equicenta® CTM is sourced exclusively through Coteau Grove Farms, home to Louisiana champions and graded stakes winners. Their carefully managed programs help provide the quality and consistency behind every vial of equicenta® CTM.

In The Arena

*"He completely tore his suspensory branch, and I was told he would never be ridden again. It was devastating. **But after the clinical trial with equicenta®, his recovery was crazy fast**—about four months—and I was back on him. It honestly felt like a miracle."*
